Geo location select Screen

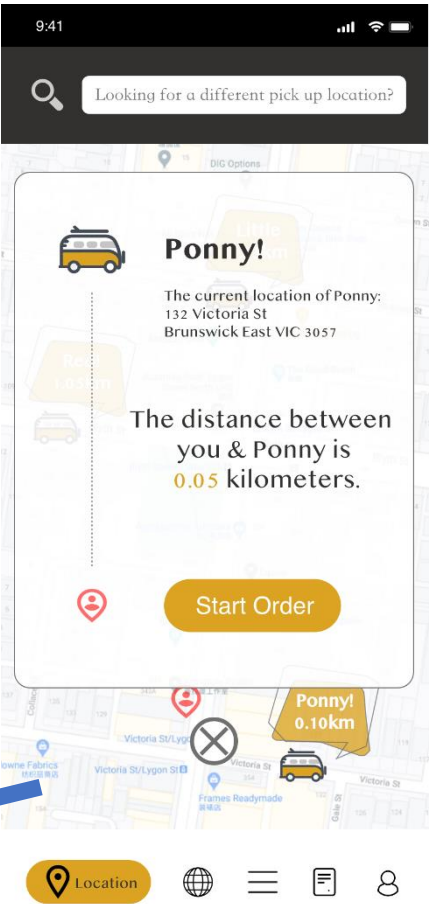

Group Name: 4399

Tutorial : T03 Thursday 11am

Group members: Bin Liang, Declan Gannon, Khin Liew, Sunchuangyu Huang, Wei Zhao

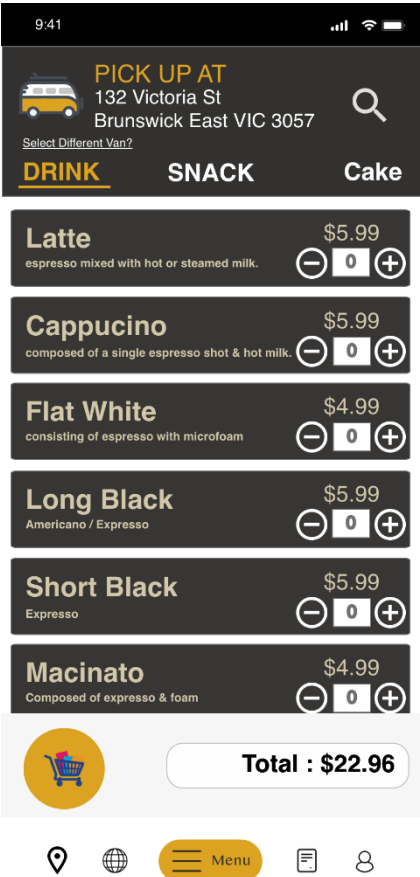

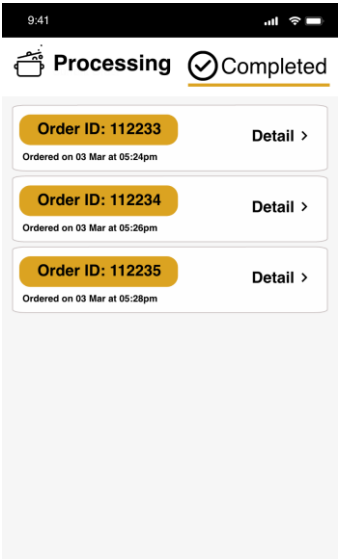

The Geo location is the first screen the customer sees when they open the application. It displays the list of vans closest to the user's set location, which can be selected the van in map, or enter location on the search bar.

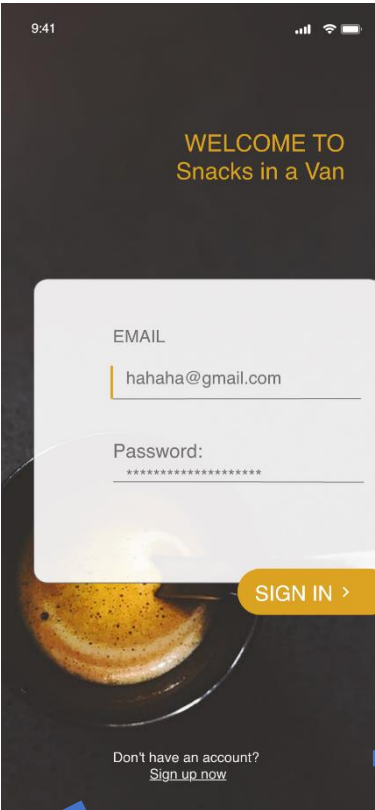

Location confirm Screen

This Screen will popup when users choose a van in the map, to confirm the location of van.

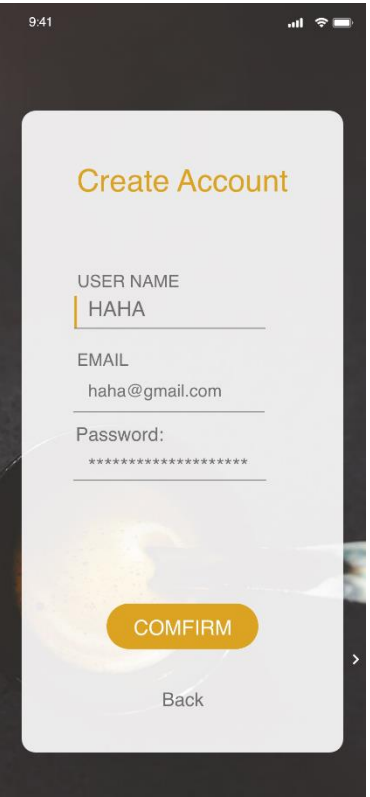

Menu Screen

Confirm a van from the Geo location Tab will prompt this screen to open. It displays the menu items available in the selected van. Although all vans share a common menu, it is necessary for each van to have a separate screen to cater for scenarios such as some items not being available in certain vans.

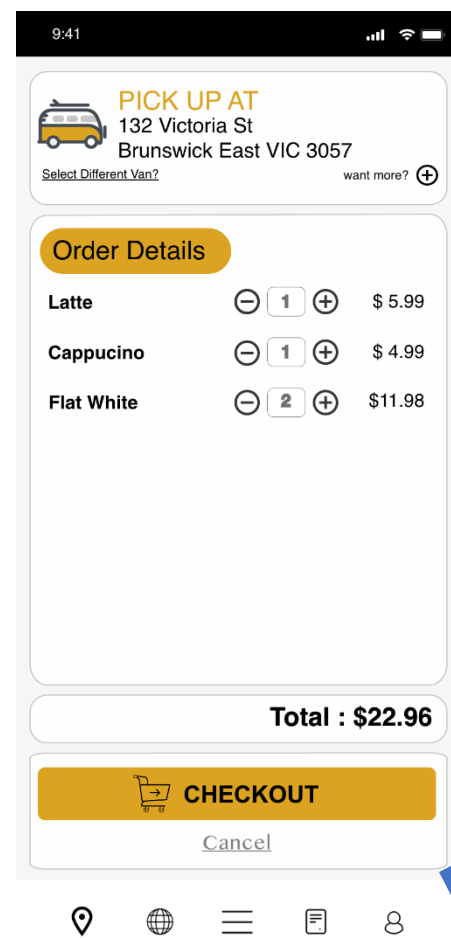

Log In Tab

The login screen is displayed in the Cart, Orders, and Profile Tabs, if the user is not logged into the app. In addition, when user wants to add item in to cart, they will turn to this page and ask for login first.

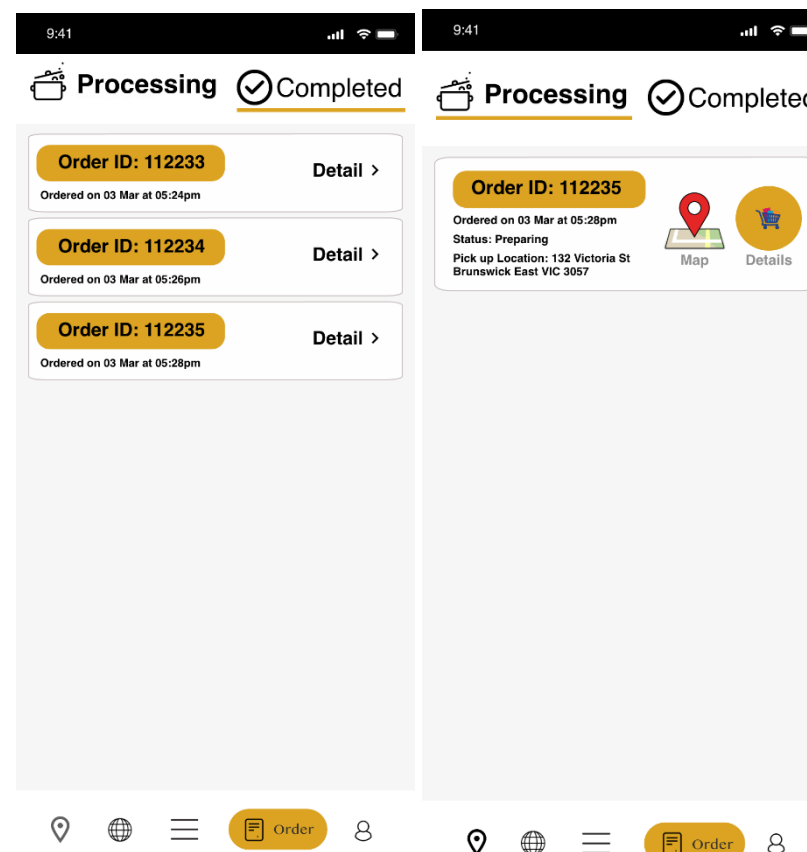

Sign in Screen

User can sign in by tap the bar in login page if they do not have account.

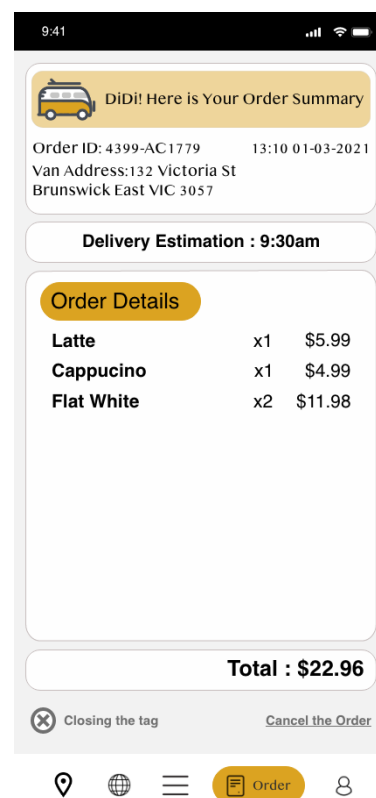

Cart Screen

The cart tab is updated as the customer selects items from the van menu screen. The app will turn to extra payment service if they decide to make a order to finish the payment.

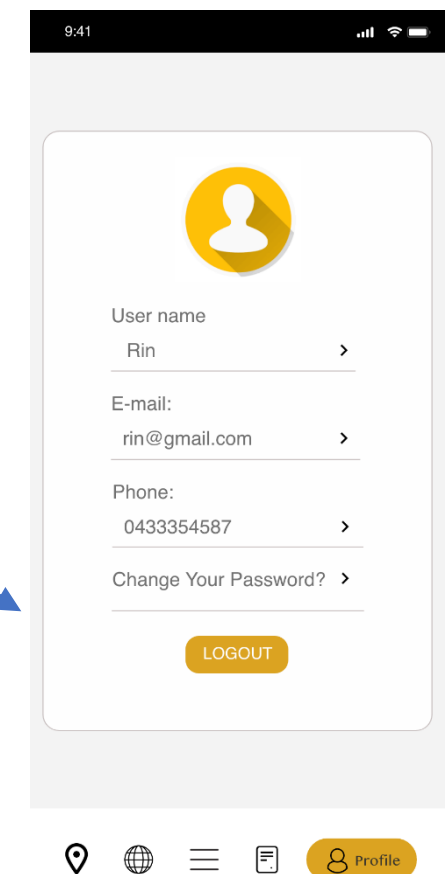

Order List Screen

Order history is displayed in the 'Orders' tab. The customer will be able to view a list of orders placed using their account. Orders are divided by their status, Processing and completed. They can see more detail by tap the 'details' button.

Order confirm Screen

Once a customer confirms an order, they are directed to the order summary screen. Here, they will be able to view details of a specific order. They will be given the option to cancel their order within 10 minutes of placing it. This screen can also be accessed via the 'Orders' tab.

Profile Screen

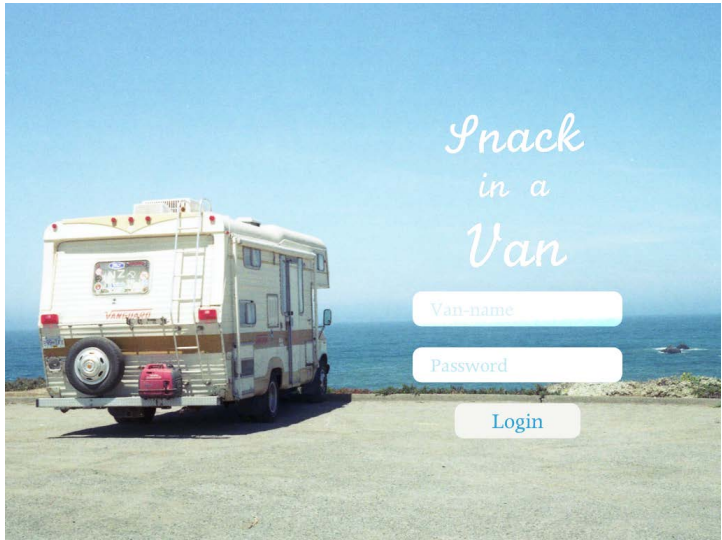

The tool bar on the bottom is used to jump between different function page, from the left to the right, they are Location, Blog, Menu, Order, Profile.

# Vendor App

## Login Page

Vendors login to the vendor app via a different URL. Vendors must login with a unique van name (login name) and password.

## Operation manual

Vendors must update the geo-location before opening the business.

The main page only displays the order within a day.

Vendors could close the business via click close button, but they need to update the geo-location again before re-open.

This page will display the brief info of each order.

Home	Order History					
Order ID	Time	Customer ID	Name	Completed Time	Delivery Time	Status
V4399-34195	20:05	C4399-003	Bin	20:11	20:11	Completed

## Order History

On the main page, the Order history column will display the five latest complete orders.

Vendors could also click the order history title to review more past orders to see more details, for example, customer name, order items and invoice.

Click the row to view order details

\$36.2

## Main Page

Vendors will spend the most time on the main page. The main page allows vendors to update the geo-location, view incoming orders and order details.

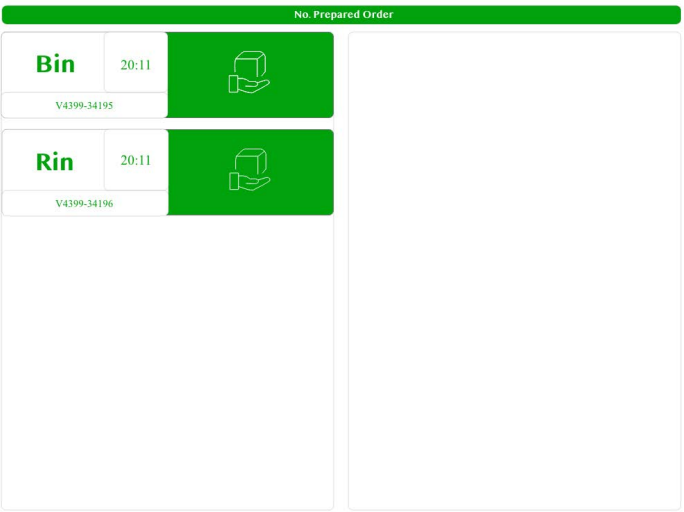

Orders display with a card that includes the customer first name, order ID, order details and a 15 minutes timer.

If the order is in the preparation stage, the timer will be blue. If the order prepared within 15 minutes, the timer will stop and turn green. If the order prepared over 15 minutes, the timer will turn red and record the time elapse before the order prepared.

Vendors could swipe the cards to view more waiting orders.

## Prepared page

In case we have a large number of prepared but un-delivered order, the page allows vendors to view prepared only.
